Welcome Address to the Participants of IOAI 2026

Welcome to one of the fastest growing education initiatives in the world

Dear IOAI 2026 participants, teachers, mentors, partners, and friends,

Welcome to the 3rd International Olympiad in Artificial Intelligence — IOAI 2026 in Astana, Kazakhstan.

Today, IOAI has a global community of 131 accredited countries and territories, representing 67,9% of the 193 UN member

states, and spanning territories where 90% of the world's population lives.

Only two years ago, in 2024, in Burgas, Bulgaria, we opened the very first IOAI. It was a pioneering moment: a bold **leap of faith** by the **32 founding countries and territories**.

The second step was the defining one. In Beijing, China, at IOAI 2025, we witnessed a **leap of success**. The promise of IOAI transformed into continuity with **61 participating countries and territories**.

Astana, Kazakhstan welcomes **108 countries and territories, 42 of which are receiving financial support**. IOAI is one of the fastest-growing education initiatives in the world, the fastest-growing international science Olympiad ever, and as of now - the second biggest after IMO (mathematics). IOAI proved it has a strong foundation and is here to flourish. This year is a leap **into the future**.

I am grateful to our hosts in Kazakhstan — the **Government of Kazakhstan** for their support, the **Kazakh CPFED**, the local organizing team led by **Danabek Kaliyazhdarov**, the **Host Scientific Committee**, volunteers, institutions, and all local sponsors and partners who have made IOAI 2026 possible.

*The growth of IOAI is global, and also **regional**.*

The **African community** has **39 accredited countries and territories**, or **72%** of the **54 African countries and territories**, with **15** participating in the first AIOAI in Tunisia this year, and **28** registered for IOAI 2026. This is a historic step for Africa's place in the international science Olympiad movement — by far the largest African participation in an international science Olympiad ever.

The **Asia-Pacific region** has **45 accredited countries and territories**, or **71%** of the **63 Asia-Pacific countries and territories**, with **21** participating in the first APOAI — the largest Regional OAI so far, led by China in 2026. **40 Asia-Pacific countries and territories** are registered for IOAI 2026.

Europe has **33 accredited countries and territories**, or **80%** of the **41 European countries and territories**. The first European OAI of the IOAI family will be held in Serbia in 2027. We have **29 European countries and territories** registered for IOAI 2026.

The Americas have **14 accredited countries and territories**, or **40%** of the region's **35 countries and territories**, **11** of which are registered to represent the region at IOAI 2026.

*IOAI growth is global, and also **inclusive and year-round**.*

IOAI is building an ecosystem through its initiatives: **IOAI GAITE — the Global AI Talent Empowerment** programme for talent empowerment and inclusion; support for the **IOAI national selections** in partnership with Brazil's **EduSpace**; the **IOAI² AI Models Track**; the **IOAI Alumni Network**; and the **IOAI Open Education Hub**, our commitment to open educational resources, including a growing **IOAI task database** on the official website, contributed by our community.

*IOAI growth is global, and also **grateful**.*

The **Bulgarian Award for Outstanding Contribution to IOAI** will be presented for the **second time** this year. Established by the IOAI founders, it honors those whose vision, dedication, and leadership have helped shape the legacy, growth, and global impact of IOAI.

IOAI is grateful to **UNESCO and its Director-General** for granting **patronage** for a second year, and for the cooperation with the laureates of the UNESCO–Uzbekistan Beruniy Prize on the topic of ethics in AI.

IOAI is grateful to our **global and local sponsors, and technology partners** for standing with us and helping us build stability, scale, and opportunity. Thank you: IMC Trading (Global Diamond Sponsor), Jane Street (Global Diamond Sponsor), Google (Global Platinum Sponsor), Huawei (Local Platinum Sponsor), Galbot (Local Platinum Sponsor and Technical Partner), Mohamed bin Zayed University of Artificial Intelligence (Global Gold Sponsor), Hudson River (Local Gold Sponsor), DeepInfra (Local Silver Sponsor and Technical Partner).

I want to thank the **IOAI International Board** and the **International Scientific Committee** for their tireless work and commitment throughout the year. I also want to thank the **International Jury**, which is taking on the challenging task of conducting the IOAI 2026 competition in a fair, transparent, and professional way. And I want to thank the educators, mentors, team leaders, parents, and national organizers who prepare, encourage, and believe in the students.

IOAI growth is global, and it is for every student - from the first round of national selection to the national teams.

Dear competitors — IOAI exists because of you.

You are not only here to solve tasks. You are here to meet future friends, future colleagues, and future partners. You are here to learn how to compete with integrity, to think with courage, and to build with responsibility. AI will be one of the defining forces of your generation. You will help decide whether it divides or connects, excludes or empowers, imitates intelligence or serves humanity.

So make this week count. Compete boldly. Learn generously. Celebrate each other. **You are the future leaders of the world. As such, remember: building bridges is far more important than creating boundaries — whether among people, or between people and technology.**

Welcome to IOAI 2026 — for the glory of humankind and the honor of your teams.

The IOAI International Board, the IOAI International Scientific Committee, and I personally invite all of you to contribute to IOAI — through feedback, task proposals, and bold ideas. Please reach us at: board@ioi-official.org | isc@ioi-official.org | elena@ioi-official.org

Elena Marinova,

Co-founder and Chair of the Board, International Olympiad in Artificial Intelligence (IOAI)

Welcome Address from Bagdat Mussin, President of the Kazakhstan Competitive Programming Federation

Dear participants, team leaders, and observers from around the world,

On behalf of the Kazakhstan Competitive Programming Federation and the entire organizing committee, it is with great joy and pride that I welcome you to IOAI 2026 – the International Olympiad in Artificial Intelligence, held for the first time on Kazakh soil, in the heart of Eurasia, in the city of Astana.

The Head of our State, Kassym-Jomart Tokayev, places enormous emphasis on the development of digitalization and the

integration of artificial intelligence into public administration. These directions have become key strategic priorities shaping the future of new generations. It is therefore symbolic that IOAI 2026 is taking place in Astana in the year declared by the President's decision as the Year of Digitalization and AI.

For Kazakhstan, it is a tremendous honor to host the best young talents from more than 100 countries. Our goal is to create a space for you where breakthrough ideas are born and the future of the AI industry takes shape.

IOAI is far more than a competition. Artificial intelligence is rapidly transforming the face of the world today, and this Olympiad is becoming a true gateway to the future. Every line of your code and every unconventional solution at this Olympiad is a real step forward at the cutting edge of technological progress, opening new horizons for artificial intelligence. It is you who will determine the future development of the global AI community.

We are proud that Astana has today brought together leading educators, researchers, and practitioners from across the globe for a shared dialogue and the creation of new standards in AI education.

Beyond the intense competitive program, you will also have the chance to discover Kazakhstan's rich cultural heritage and the genuine hospitality of the Kazakh people. We sincerely hope that you will leave Kazakhstan not only with awards, but with strong professional connections and friendships that will last for years to come.

I wish every participant maximum focus, elegant solutions, and unforgettable memories of your time in Kazakhstan.

Welcome to IOAI 2026 – an important step for all of us on the path into the fascinating world of artificial intelligence!

Bagdat Mussin
Head of CPFED, IOAI 2026 Host Team

ABOUT IOAI 2026

The Republic of Kazakhstan will host the third International Olympiad in Artificial Intelligence (IOAI), the world's newest and most rapidly expanding international science olympiad. The Olympiad will convene in Astana from 2 to 8 August 2026, bringing together leading young talents in artificial intelligence from across the globe.

This edition represents the largest to date, with more than 100 teams from over 103 countries and territories participating, drawn from a global IOAI community of over 130 accredited countries. Following its inaugural edition in Bulgaria in 2024 and its second edition in China in 2025, the Olympiad will be held in Central Asia for the first time, under the patronage of UNESCO.

In addition to the competition itself, IOAI 2026 will serve as a platform for dialogue among students, educators, and researchers, fostering international collaboration in the field of artificial intelligence.

International Organizer

IOAI International Organizing Committee

Host Organization

Kazakhstan Competitive Programming Federation

ABOUT CPFED

The main host of IOAI 2026 is the **Kazakhstan Competitive Programming Federation (CPFED)**.

Established as a republican public association, the Federation is dedicated to the development and promotion of competitive programming throughout Kazakhstan. It works closely with educational institutions, industry experts, and the broader IT community to build a strong ecosystem for programming excellence. Through initiatives such as training programs, national and international competitions, and educational projects, CPFED supports the development of young talent and fosters the skills essential for success in the rapidly evolving world of technology.

Among the events organized by the Federation are the **2024 ICPC World Finals** in Astana, national school and university informatics Olympiads, the Kazakhstan Competitive Programming Championship, the "**Uzdik IT Ustaz**" tournament for informatics teachers, ICPC qualifying rounds, and online programming contests hosted on the Federation's platform.

Visit **cpfed.kz** to learn more.

IOAI SPONSORS

Kaspi.kz

General partner

The mission of Kaspi.kz is to create innovative products and services that improve the lives of our beloved customers and partners.

Kaspi.kz services are used by over 25 million customers and 900,000 partners in Kazakhstan and Turkey. In Kazakhstan, the Kaspi.kz super-app integrates payments, e-commerce, an online supermarket, fintech, travel services, classifieds, government services, and other daily-use features.

In Turkey, Kaspi.kz owns Hepsiburada, one of the country's leading e-commerce platforms.

FREEDOM

Brilliant partner

Freedom Holding Corp. is a diversified financial services company engaged in brokerage, securities trading, investment research and advisory, investment banking and underwriting services, mortgage, insurance, telecommunications, online sales of airline tickets and tickets for cultural and sporting events, offers online supermarket services and many others. Including its subsidiaries, Freedom Holding Corp. has more than 11,000 employees. The holding's divisions and subsidiaries are located in 22 countries, including Kazakhstan, the United States, Cyprus, Poland, Spain, Uzbekistan and others. Freedom Holding Corp. common stock is registered with the U.S. Securities and Exchange Commission and trades under the ticker FRHC on the Nasdaq Capital Market.

imc

IMC is a research and tech-driven trading firm with offices across the US, Asia Pacific, and Europe. We use AI to build the models and strategies that predict market behaviour and drive performance. We hire and develop exceptional, high-performing people, and empower them with cutting-edge, disruptive technologies – including AI, machine learning, and large-scale computing.

Jane Street works differently. We are a quantitative trading firm active on more than 200 trading venues across 45 countries. As a liquidity provider and market maker, we help form the backbone of global markets. Our approach is rooted in technology and rigorous quantitative analysis, but our success is driven by our people.

We are always recruiting top candidates and we invest heavily in teaching and training. The environment at Jane Street is open, informal, intellectual, and fun. People grow into long careers at Jane Street because there are always new and interesting problems to solve, systems to build, and theories to test. More than twenty years after our founding, it still feels like we're just getting started.

Think of Jane Street as a research lab with a trading desk attached to it - we believe deep learning is the future of quantitative trading. To get us there, our machine learning team creates the neural network models driving our trading strategies, and builds the infrastructure that make training and inference possible.

Find out more about Machine Learning at Jane Street at <https://www.janestreet.com/ml>.

Find out more about our educational programs, internships, and full time roles at www.janestreet.com.

Documentolog

Gold partner

Documentolog is Kazakhstan's leading business process automation company and the developer of d8n.ai, a multi-agent AI Business Operating System. For over 19 years, the company has been helping government organizations and businesses accelerate digital transformation through AI-powered automation.

astana hub

The largest international innovation cluster in Central Eurasia, bringing together more than 2,200 technology companies. We foster the growth of startups, IT businesses, and tech talent by providing access to educational and acceleration programs, investment opportunities, international partnerships, and a wide range of digital services.

Alem.ai is an international artificial intelligence center that brings together education, research, startups, and innovation to drive the development of Kazakhstan's AI ecosystem.

Higgsfield

Higgsfield is an AI-native video platform built for professional production, empowering independent creators, agencies, studios, and Fortune 500 companies to create cinematic-quality content at scale.

Founded by Alex Mashrabov and Yerzat Dulat, Higgsfield has become the fastest-growing generative AI company in the world, serving more than 26M users and powering 6M+ AI generations every day.

What sets Higgsfield apart is its team. Like Pixar brought together artists and technologists to reinvent animation, Higgsfield brings together award-winning directors, cinematographers, producers - whose work spans global campaigns for brands including Nike, Adidas, Samsung, and Coca-Cola - with world-class machine learning engineers. They build side by side, shaping every product through a continuous creative feedback loop.

Today, Higgsfield is building the future of creative technology and that future is being built by exceptional people. As the company continues its global expansion, it's growing its team across Kazakhstan and Central Asia.

Join Higgsfield: <https://jobs.ashbyhq.com/higgsfieldai>

Global sponsors

Platinum sponsor

Founded in 1987, Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. We have approximately 213,000 employees and we operate in more than 170 countries and regions, serving more than 3 billion people around the world. We are committed to bringing digital to every person, home and organization for a fully connected, intelligent world.

The logo for Hudson River Trading (HRT) is an orange square with the letters "HRT" in white, bold, sans-serif font.

Hudson River Trading (HRT) is a leading quantitative trading firm at the forefront of technical innovation in global financial markets. Every day, we bring together the world's sharpest minds to collaboratively solve challenging problems and build technology that will drive the future of trading. Leveraging one of the world's most sophisticated computing environments for research and development, we trade across multiple asset classes and time horizons on more than 200 markets worldwide. We are a leading voice advocating for fair and transparent markets everywhere and dedicated to creating a better trading landscape for all.

GALBOT

Galbot is a global pioneer in embodied AI and general-purpose humanoid robotics, developing autonomous humanoid robots for real-world applications. Its flagship robot, Galbot G1, has been deployed at scale across retail, industrial, logistics, healthcare, and education, achieving over a year of stable, continuous real-world operation.

As the official humanoid robot platform for the IOAI 2026 Team Challenge, Galbot provides the real robot platform—Galbot G1—enabling teams to bring their AI algorithms from simulation into the physical world.

Mohamed bin Zayed
University of
Artificial Intelligence

Global Gold sponsor

Mohamed bin Zayed University of Artificial Intelligence (MBZUAI), located in Abu Dhabi, UAE, is the world's first university dedicated exclusively to artificial intelligence. Ranked among the world's top 10 AI institutions by CSRankings, MBZUAI offers a highly selective Bachelor of Science in Artificial Intelligence for students passionate about shaping the future of AI. A fully funded scholarship is available for outstanding admitted students.

The program features a distinctive 3+1 model, combining three years of rigorous AI education with a full year of cooperative education at leading research institutions such as MIT, École Polytechnique and global tech giants including Google and Microsoft. Students gain hands-on experience while addressing real-world AI challenges and benefit from close mentorship by world-class faculty, cutting-edge research opportunities, and strong industry partnerships. MBZUAI prepares graduates to become future AI leaders equipped to drive innovation and create meaningful impact worldwide.

ABOUT IOAI MISSION AND HISTORY

About IOAI

The International Olympiad in Artificial Intelligence (IOAI) is a global science competition for school students focused on artificial intelligence. Launched in 2024, IOAI brings together talented young people from around the world to develop their knowledge, creativity, and problem-solving skills in AI.

In just two years, IOAI has grown into one of the fastest-growing international science Olympiads. Its community now includes **131 accredited countries and territories**, spanning regions where approximately **90% of the world's population lives**.

The 3rd International Olympiad in Artificial Intelligence, **IOAI 2026**, is taking place in **Astana, Kazakhstan**, welcoming participants from **108 countries and territories**, including 42 teams receiving financial support.

Beyond the annual competition, IOAI is building a year-round global ecosystem through education, talent development, open resources, regional initiatives, and its growing alumni community.

IOAI Mission

IOAI aims to make artificial intelligence education accessible, inclusive, and inspiring for students around the world.

IOAI History

2024 - Burgas, Bulgaria

The first International Olympiad in Artificial Intelligence was held in Burgas, Bulgaria. It marked the beginning of a new international science Olympiad, with **32 founding countries and territories** taking part.

2025 - Beijing, China

The second IOAI demonstrated the rapid growth of the initiative, bringing together **61 participating countries and territories** and establishing IOAI as a continuing global competition.

2026 - Astana, Kazakhstan

The third IOAI marks another major step in the Olympiad's development. **108 countries and territories** are registered to participate, making IOAI one of the fastest-growing international science Olympiads.

From its first edition in 2024 to a global community of 131 accredited countries and territories, IOAI continues to expand its reach and build an international community around AI education.

INTRODUCTION TO ASTANA, KAZAKHSTAN

Astana, the capital of the Republic of Kazakhstan, is one of the youngest and fastest-growing capital cities in the world. Established as the nation's capital in 1997, the city has undergone a remarkable transformation over the past three decades, evolving from a modest provincial center into a modern metropolis on the banks of the Ishim River. Situated at the crossroads of Europe and Asia, Astana reflects Kazakhstan's role as a bridge between the two continents, with a skyline shaped by bold contemporary architecture, including the Baiterek Tower, the Palace of Independence, the Khan Shatyr entertainment center, and the Nur-Astana Mosque.

Astana has positioned itself as Central Asia's leading center for artificial intelligence, anchored by Alem.ai, the region's first International Artificial Intelligence Center, focused on advancing AI technologies in key sectors such as science, industry, creative industries, and government services. Spread across eight floors, the center combines AI education, startup acceleration, research laboratories, public-sector digitalization, and commercial AI deployment under a single ecosystem, alongside R&D laboratories operated by major international technology companies.

Astana regularly serves as a venue for major international forums, scientific congresses, and diplomatic and cultural events, reinforcing its role as a platform for global cooperation in science, education, and emerging technologies such as artificial intelligence.
